

# Camera Movements

# Tilt

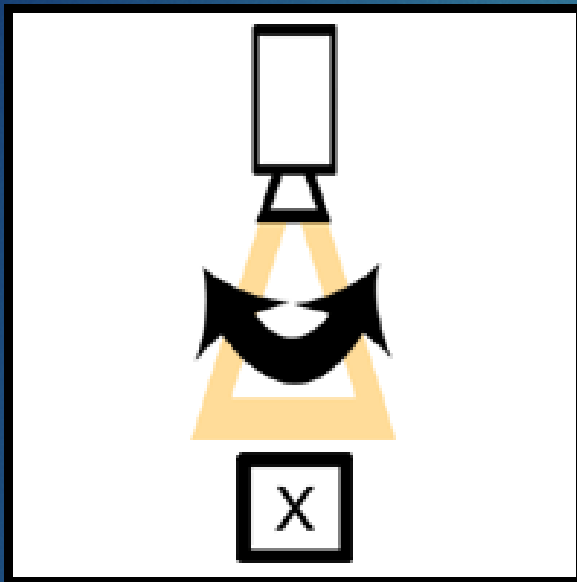

- ▶ Rotating the camera up and down

# Pan

- ▶ Rotate the camera left or right

# Zoom

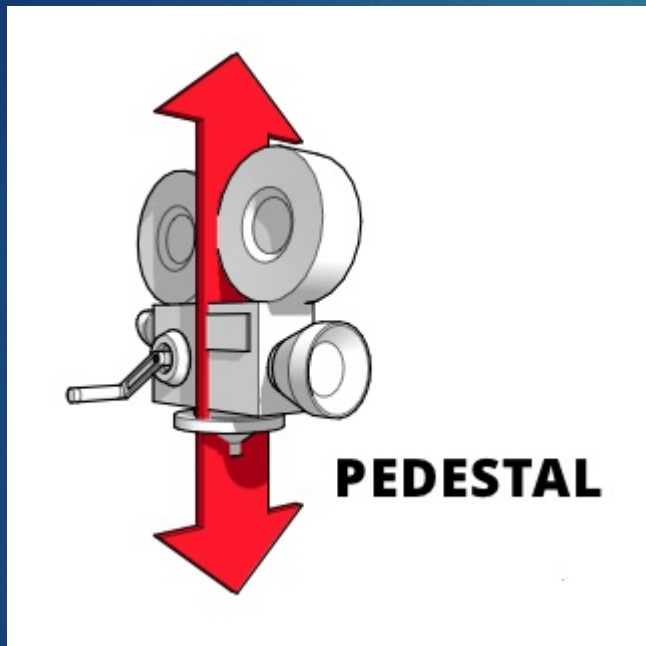

- ▶ Zooming with the camera can be shaky
- ▶ Instead, walk and get closer to the subject to zoom

# Pedestal

- ▶ Moving the camera up and down

# Dolly

- ▶ Move the entire camera forwards or backwards

# Tracking or Trucking Shot

- ▶ Same as dolly, except moving the camera left and right

# Dolly Zoom or “Vertigo Effect”

- ▶ Camera moves closer or further from subject while adjusting the zoom to keep subject the same size in the frame
